3. IRAQ'S EXTERNAL SECTOR & TRADING PARTNERS

Oil exports destination

Total value of iraqi oil export 2012: 94 billion US\$

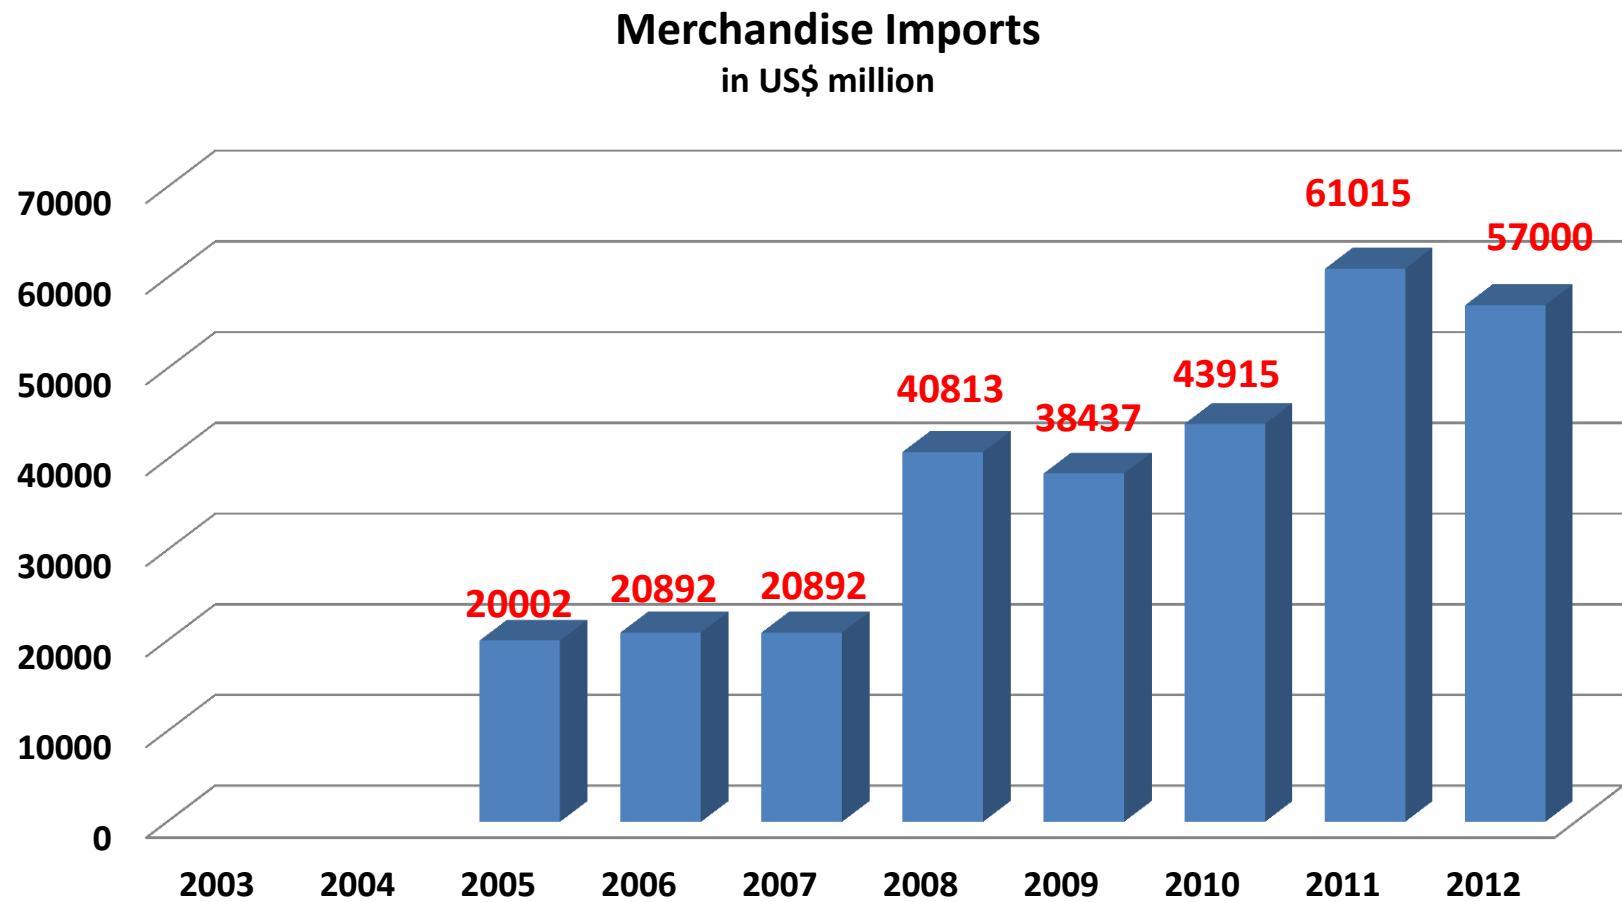

- Iraq was the sixth largest net exporter of petroleum liquids in the world in 2012, with the majority of its oil exports going to the United States and to refineries in Asia
- Iraq exported 2.4 million bbl/d of crude oil in 2012, according to tanker data from Lloyd's List Intelligence. About 2.1 million bbl/d of these exports came from Iraq's southern sea ports,
- Only 0.4 bbl/d was exported via the Iraq-Turkey pipeline in the north.

Risks to the Macroeconomic Outlook

According to a recent IMF report risks remain high. They include:

- Weak policy implementation, particularly in the fiscal policy area
- Further deterioration of the political and security situation
- A larger-than-projected decline in global oil prices

Conclusion

However, despite the afore mentioned risk, over the medium and long term, Iraq's macroeconomic prospects will continue to be positive for private business, as

- Oil production and revenues are expected to increase substantially
- Large scale investment in major strategic projects will be executed
- Overall growth rate is projected by IMF to be above 8 percent and inflation at 5-6 percent until 2018
